

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

| | |
|------------------------------------|---|
| Site Name: | Panhandle Eastern, Zionsville Compressor Station |
| Applicant's Name: | Panhandle Eastern Pipe Line Company |
| Site Location: | 9371 Zionsville Road Indianapolis Marion County |
| VRP Site Number: | 6980305 |
| Project Manager: | Damon Ridley |
| Date Application Received: | March, 1998 |
| Date Project Completed: | December, 1999 |
| Project Duration: | 1 year, 9 months |
| Contaminant Group(s): | Polychlorinated Biphenyls (PCBs), Semi-Volatile Organic Compounds (SVOCs) |
| Media Cleaned Up: | Surface Soils, Subsurface Soils |
| Cleanup Goals Achieved: | Tier II Nonresidential |
| Deed/Land Use Restrictions: | Nonresidential |

Project Description: Panhandle Eastern Pipe Line Company (PEPL) owns and operates a natural gas pipe line system extending from Texas to Michigan. This site was constructed in 1937. Prior to 1973, lubricants containing PCBs were used in some of the air compressors associated with the air tanks and the supply system at the compressor station. This is one of five pumping stations in the state of Indiana, all of which were part of a company-wide comprehensive Phase II site investigation.

The remediation consisted of the removal and disposal of contaminated soils in an approved landfill. The investigation of the 100-acre site included over 500 surface and subsurface soil samples over the potentially impacted areas. Over 1,200 cubic yards were remediated by machine or hand excavation methods for off-site disposal. Confirmation sampling demonstrated that the applicant successfully attained the VRP's Tier II Nonresidential cleanup goals.
